ANIMAL SCIENCE

COLLEGE OF AGRICULTURAL SCIENCES

Graduate Faculty:

AbuGhazaleh, Amer A., Associate Professor, Ph.D., South Dakota State University, 2002; 2004. Dairy Nutrition.

Appar, Gary A., Associate Professor and Interim Chair, Ph.D., Virginia Polytechnic Institute, 1994; 1998. Monogastric nutrition, swine production.

Arthur, Robert, Professor, Emeritus, Ph.D., University of Missouri, 1970; 1977.

Atkinson, Rebecca L., Assistant Professor, Ph.D., University of Wyoming, 2006; 2006. Beef nutrition, forages.

Banz, William J., Professor, Ph.D., University of Tennessee, 1995; 1995. Human nutrition, nutritional physiology.

Davis, Jeremy, Assistant Professor, Ph.D., Iowa State University, 2008; 2009. Human nutrition, nutritional physiology.

Gastal, Eduardo L., Assistant Professor, DVM, Federal University of Pelotas, Brazil; Ph.D., University of Wisconsin-Madison, 1985; 1999; 2009. Reproductive physiology.

Goodman, Bill L., Professor, Emeritus, Ph.D., Ohio State University, 1959; 1958.

Hausler, Carl L., Associate Professor, Emeritus, Ph.D., Purdue University, 1970; 1970.

King, Sheryl S., Professor, Ph.D., University of California, Davis, 1983; 1983. Reproduction physiology, equine science.

Kroening, Gilbert H., Professor, Emeritus, Ph.D., Cornell University, 1965; 1969.

Olson, Howard H., Professor, Emeritus, Ph.D., University of Minnesota, 1952; 1954.

Small, Brian C. Associate Professor, Ph.D., University of Maryland, 1998; 2009. Aquaculture & Fish Nutrition/Physiology.

Smith, Sylvia, Assistant Professor, Ph.D., University of Tennessee, 2007;2008. Food Service Management/Local Foods.

Winters, Todd A., Professor and Interim Dean, Ph.D., University of Wisconsin-Madison, 1992; 1994. Animal biotechnology, reproductive physiology, endocrinology.

Young, Anthony W., Professor, Emeritus, Ph.D., University of Kentucky, 1969; 1980.

The Department of Animal Science, Food and Nutrition offers programs of study leading to the Master of Science degree with a major in animal science. Programs may be designed either as thesis or non-thesis in the various disciplines of nutrition, reproductive physiology, biotechnology and/ or growth and development with emphasis on beef cattle, dairy cattle, horses, swine, fish or humans. Other animal or cell culture systems are sometimes used as research models.

Admission to programs administered by the Department of Animal Science, Food and Nutrition must be approved by the Graduate Programs Committee. Application forms are available online at http://www.gradschool.siuc.edu/applygrad.htm. Applicants must have the registrar of each college previously attended send official transcripts directly to the Department of Animal Sciences, Food and Nutrition.

This program requires a nonrefundable $50.00 application fee that must be submitted with the application for Admissions to Graduate Study in Animal Science, Food and Nutrition. Applicants may pay this fee by credit card if applying electronically. Applicants submitting a paper application must pay by personal check, cashier’s check, or money order made out to SIU, and payable to a U.S. Bank.

Requirements

Minimum requirements for students entering the master’s degree program are: (a) a bachelor’s degree in Animal Science, Dairy Science, Biological Sciences, or related field; (b) a minimum 3.0 cumulative undergraduate G.P.A. (A=4.0); (c) 800 cumulative score with minimum scores of 350 on the verbal or quantitative sections and a 3.2 analytical writing score on the Graduate Record Exam (GRE); (d) Statement of Research Interests; (e) three letters of recommendation (at least two from undergraduate professors); and (f) TOEFEL exam for international students. Students can be admitted with a G.P.A. under 3.0 or for a GRE deficiency on a conditional basis and must enroll in a minimum of seven hours of structured courses at the 400-500 level during their first semester and achieve a B or better in each course or be dropped from the program. Undergraduate courses cannot be given graduate credit.

Minimum requirements for the master’s degree may be fulfilled by satisfactory completion of 35 semester hours of graduate credit, with a minimum of 20 hours inside animal science, a minimum of 15 hours of 500-level graduate courses, and at least 8 hours outside the College of Agricultural Sciences. A maximum of two animal production related courses (ANS 409, 430, 465, 485) may be counted
for graduate credit in the thesis option. Additional University requirements are stated in the SIUC Graduate Catalog. Specific required course work includes:

a. Two semesters of ANS 581 (Seminar)
b. Two semesters of graduate-level statistics
c. A minimum of one semester of upper-level biochemistry
d. Six credit hours of ANS 595

Each student, whether in the thesis or non-thesis option, will be mentored by a member of the Animal Science, Food and Nutrition faculty designated as the major professor. The major professor will serve as the research mentor and academic advisor. A graduate advisory committee will be selected with consultation of the major professor. The committee will consist of no fewer than three graduate faculty members. Two members of the committee must be from the Animal Science, Food and Nutrition faculty, and one of the members of the committee must be from outside the department. The major professor will chair the student’s graduate committee.

All candidates in the thesis option are required to conduct original research. All candidates in the non-thesis option cannot take ANS 599 (Thesis) for graduate credit. All students are encouraged to participate in research within the department to provide a broader experience. Each master’s degree candidate must pass a comprehensive oral examination covering all graduate work including the thesis or research paper.

Information concerning admission policies, requisites for graduation, and availability of financial assistance for graduate study in animal science may be obtained from the Department of Animal Science, Food and Nutrition, Southern Illinois University Carbondale, Carbondale, IL 62901-4417; (618) 453-2329; http://www.coas.siu.edu/default2.asp?active_page_id=112.

Courses (ANS)

Field trips are required for certain courses.

409-4 Equine Science. Designed for students interested in the more scientific aspects of equine physiology and management. The class will take a more advanced look at anatomy and physiology of the systems of the equine and consider how they relate to selection, use and management. Lecture and laboratory. Lab fee $50. Prerequisite: 219 and 331.

415-4 Advanced Animal Nutrition. Advanced principles and practices associated with digestion, absorption and metabolism of nutrients as related to domestic monogastrics, ruminants and horses. Prerequisite: 215 and 315.

419-4 Stable Management. Designed for the advanced equine student planning a career in the horse field. Mastery of in-depth management techniques on an applied basis is emphasized. Farm, animal and personnel management are practiced. Extensive out-of-class practice time is expected. Prerequisites: ANS 409 with a grade of C or better. Lab fee: $90.

421-2 International Animal Production. A study of world animal production practices with emphasis on the developing countries. Adaptability of animals to environmental extremes and management practices employed to improve productivity. Prerequisite: ANS 121. Restricted to junior standing.

425-3 Biochemical Aspects in Nutrition. (Same as HND 425) The interrelationship of cell physiology, metabolism and nutrition as related to energy and nutrient utilization, including host needs and biochemical disorders and diseases requiring specific nutritional considerations. Prerequisite: ANS 215 or HND 320, CHEM 140B, PHSL 201, and 208.

426-3 Comparative Endocrinology. Comparative endocrinology of the effects of hormones on target tissues including mechanisms of hormone biosynthesis, release, transports, receptor kinetics, and signal transduction. Measurement of hormones, receptors, and signal transduction. Endocrine-related diseases and disorders. Prerequisite: ANS 331.

429-2 Equine Enterprise Management. Study of the diverse horse industry and business management practices involved with the operation of a successful horse enterprise. Analysis of a commercial horse operation will be explored through an in-depth, self-directed farm project. Field trips and guest speakers will inform students for the farm project. An on-campus horse event will be planned and executed as a class project. Prerequisites: ANS 409, ABE 350 or 351. Field trip fee: $40.

430-4 Dairy Cattle Management. Application of the principles of breeding, physiology and economics to management of a profitable dairy herd. Breeds of dairy cattle, housing, milking practices and quality milk production. Field trip. Lab/Field Trip Fee: $35. Prerequisites: ANS 315.

431-4 Reproductive Physiology. Comparative anatomy and physiology of the male and female reproductive system of domestic animals; hormones; reproductive cycles; mating behavior; gestation and parturition; sperm physiology; collection and processing of semen; artificial insemination, pregnancy tests; diseases. Laboratory fee $10. Prerequisite: ANS 121, ANS 331.

433-4 Introduction to Agricultural Biotechnology. (Same as PSAS 433, PLSS 433, and PLB 433.) This course will cover the basic principles of plant and animal biotechnology using current examples; gene mapping in breeding, transgenic approaches to improve crop plants and transgenic approaches to improve animals will be
considered. Technology transfer from laboratory to marketplace will be considered. An understanding of gene mapping, cloning, transfer and expression will be derived. Restricted to senior standing or consent of instructor.

434-2 Physiology of Lactation. Anatomy and physiology of milk secretion; endocrine control; milk precursors and synthesis; milk composition; physiology and mechanics of milking; lactation-related disorders and diseases; transgenic milk. Prerequisite: ANS 331.

435-1 to 4 Agricultural Molecular Biotechnology Seminar. (Same as Plant and Soil Science 435) Molecular biology is rapidly making important contributions to agricultural science through biotechnology. An appreciation of the techniques of molecular biology and their application to plant improvement is important for all in agriculture and biology. The relationships between plant molecular biology and the biotechnology industry will be discussed. Presentations on particular research problems will be made. Graded P/F only.

455-2 Animal Nutrient Management. Scope and problems associated with animal nutrient management; current regulations and law on environmental protection. Principles covering waste management technology and current livestock nutrient management systems are presented. Field trips will be scheduled. Restricted: junior standing.

465-4 Swine Management. Swine production systems and management techniques including breeding and selection, reproduction, nutrition, herd health and disease prevention, housing and waste management, marketing, production costs and enterprise analysis. Field trip. Lab $35. Prerequisites: ANS 315 or consent of instructor.

477-3 Aquaculture. (Same as ZOOL 477). Production of food, game and bait fishes. Design of facilities, chemical and biological variables, spawning techniques, diseases and nutrition. Two lectures per week and one four-hour laboratory on alternate weeks. Prerequisites: BIOL 200A or ZOOL 118 or ANS 121 with a grade of C or better.

485-4 Beef Cattle Management. Beef cattle production systems and management, breeding and selection, reproduction, nutrition, and herd health with emphasis on the most economical and efficient systems. Lab/Field Trip: $35. Prerequisite: ANS 315, ANS 332 or concurrent enrollment.

495-1 to 6 Instruction in the Animal Sciences. Acquaints the students with different teaching environments and styles. Students will be expected to participate in instructing animal science courses. Prerequisite: junior standing. Consent of instructor. Not for graduate thesis option credit.

500-3 Research Methods in Agricultural Science. Experimental design and biometry as applied to biological and allied fields. Restricted to graduate students.

506-3 Instrumentation Methods in Agricultural Science. Basic methods and techniques of analytical instrumentation used in human and animal nutrition are taught in the lectures with applications of instruments carried out in the laboratories. Lab Fee: $100. Special approval needed from the instructor.

515-3 Energy and Protein Utilization. (Same as Food and Nutrition 515) Energy and protein utilization including digestion, absorption and metabolism as related to mammalian physiology. Prerequisite: CHEM 339 or 340.

516-3 Minerals and Vitamins. (Same as Food and Nutrition 516) Basic and applied principles of mineral and vitamin metabolism. Emphasis on metabolic functions, reaction mechanisms and interrelationships. Prerequisite: CHEM 339 or 340.

525-3 Ruminant Nutrition. Physiology of rumen, action and microbiology of rumen digestion and utilization of carbohydrates, lipids, and nitrogenous substances in ruminant animals. Absorption and assimilation of nutrients by the ruminant animals. Feeding standards for maintenance, growth, reproduction and lactation. Two lectures per week. Prerequisite: ANS 415 or consent of instructor.

531-1 to 6 (2,2,2) Advanced Animal Physiology. Advanced Physiological concepts as they relate to mammalian systems-subjects covered are: (a) advanced reproductive physiology (b) developmental physiology (c) endocrine physiology. Prerequisite: ANS 331 or PHSL 201.

565-3 Advanced Ruminant Nutrition. Principles of nutrients metabolism and utilization by ruminant animals in relation to maintenance, growth, reproduction and lactation. Prerequisites: ANS 415 or consent of instructor.

571-3 Fish Reproduction and Breeding. Principles of finfish reproductive strategies, reproductive physiology and captive breeding. The role of genetics and the use of biotechnology and various techniques in breeding programs will also be emphasized. The purpose of this course is to develop an understanding of fish reproduction and breeding techniques and to gain an appreciation of the complexity involved in managing a hatchery breeding program. Two lectures a week and one four-hour lab alternate weeks. Prerequisite: ANS 477 or ZOOL 477 or consent of instructor.

581-1 to 2 (1,1) Seminar. Problems relating to various phases of animal industries. Maximum of one hour per semester.

588-1 to 8 International Graduate Studies. University residential graduate study program abroad. Prior approval by the department is required both for the nature of the program and the number of credit hours.

590-1 to 3 Readings in Animal Science. Reading in specialized fields under direction of approved graduate specialists.
593-1 to 3 Individual Research. Investigation of a problem in animal science under the supervision of an approved graduate specialist.

595-1 to 4 Instruction in Animal Sciences. Acquaints the students with different teaching environments and styles. Students will be expected to aid faculty in the instruction of animal science courses.

599-1 to 6 Thesis. Credit is given for a Master's thesis when it is accepted and approved by the thesis committee. Not for non-thesis option credit.

601-1 per semester Continuing Enrollment. For those graduate students who have not finished their degree programs and who are in the process of working on their dissertation, thesis, or research paper. The student must have completed a minimum of 24 hours of dissertation research, or the minimum thesis, or research hours before being eligible to register for this course. Concurrent enrollment in any other course is not permitted. Graded S/U or DEF only.
